ABOUT THE INSTITUTE OF ADVISORS

.....

The Institute of Advisors was established in 2009 and is the leading global body representing business advisors and consultants around the world. We run certification courses in over 10 countries around the world and are leading the way in setting a worldwide set of standards.

COURSE CURRICULUM

INTRODUCTION TO THE COURSE!

In this module we introduce you to your instructor, the training platform, the modules and the assessments. We discuss the course outcomes. We show you how to use the training software and highlight the core mantra of the Institute of Advisors.

ROLE OF AN ADVISOR

In this module we take a step back and view what it means to be a good advisor. We outline what it means to provide a good outcome for clients and what expectations a client has. We discuss the similarities to a sports coach, and the importance of 'Strategy, Execution and Accountability'. We also elaborate on some of the most important traits of an advisor, such as passion, credibility, empathy and trust.

DEVELOPING A BUSINESS MODEL

In this module we guide you through the process of developing a business model from start to finish. Besides covering the modelling basics, we focus your attention towards selecting the right charge rate and identifying common barriers to entry.

CONDUCTING CLIENT DISCOVERY MEETINGS

Following the completion of this module you will have a clear understanding of how to build rapport, map out the client discovery process, and have the confidence to step into that first meeting with the necessary knowledge.

STRATEGIC DIRECTION & BUSINESS PLANNING

This module outlines the business planning process and the fundamental components to building a purposeful one. Not only do you identify the main driving forces behind strategic direction, but we also give you ready-made templates to implement in your next meeting.

MONTHLY CLIENT REVIEW MEETINGS & SCORECARDS

This module connects the dots between the business plan and the measurable objectives that form the key focus of your monthly accountable meetings. The importance of KPI's and business scorecards are highlighted by hearing from our Academic Panel members.

MARKETING MY PRACTICE

This module reviews how to successfully market your practice. We navigate you through the proven methodologies and processes that are considered staples to stand out from the crowd. We discuss business networking, advertising tips and personal selling examples.

CRISIS MANAGEMENT – BUSINESS RESILIENCE

This module looks at some immediate actions a business owner can take during a crisis. It reviews the current cash of the operation and cash burn rate and then looks at strategies to build cash. The module looks at some high priority strategic tools that a business owner can use to pivot and grow during a crisis.

CRISIS MANAGEMENT – PERSONAL RESILIENCE

In this module we discuss personal resilience in times of a crisis for both the business owner and the employees. How to take charge and think positively. Designed as a workbook, students can step their way through a 7 step process.

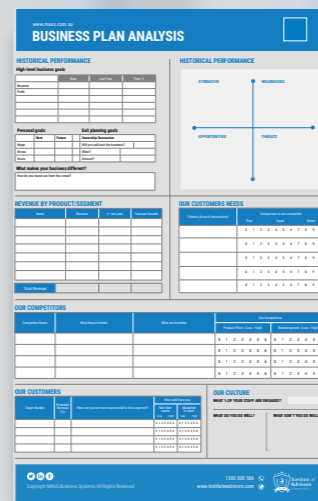

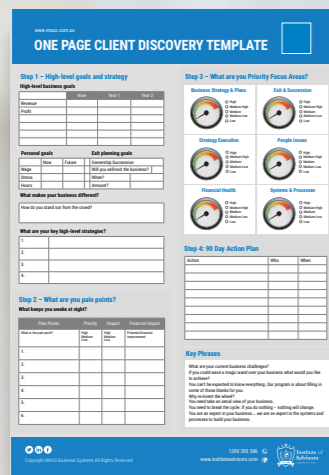

READY-MADE CLIENT TEMPLATES

As part of the course, you will receive **several client diagnostic templates** and **video instructions** on how to implement in your practice.

BE AN ADVISOR THAT STANDS OUT FROM THE CROWD.

USE THE INSTITUTE CERTIFICATE & LOGO IN MARKETING YOUR PRACTICE including LinkedIn, facebook, websites, social media, practice brochures, proposals and business cards.

HOW DOES THE COURSE BENEFIT ACCOUNTANTS, BOOKKEEPERS & PROFESSIONALS?

STRUCTURE

Accountants and Bookkeepers & financial professionals are heavily routine and financial based. Most have a set structure and avoid anything that could alter the norm. Moving outside the comfort zone needs to be gradual. Success in advisory means the implementation of a simple system that fits with the current workflow

Our Institute certification program gives you a step-by-step guide to structuring your engagements with your clients. The process can be stepped from simple monthly advisory meetings to full blown strategic assignments. You start where you feel comfortable.

CONFIDENCE

Most Accountants and Bookkeepers we speak to are experts when it comes to financial metrics, they know their numbers back to front. Unfortunately they lack the knowledge and confidence to move the discussion towards strategic metrics.

The Institute course will help to build your confidence and knowledge, to open new conversations with your existing clients and in turn open new revenue streams.

CREDIBILITY

The Institute of Advisor's logo is recognised in 10 countries, and stands as the leading professional body representing business advisors in the world.

**This Practical,
Enjoyable Course

Services**

HOW DOES THE COURSE BENEFIT NEW START BUSINESS ADVISORS

CREDIBILITY & MARKETING

Independents such as ex business managers and owners make great business advisors. However, independents often feel alone when stepping away from a field they have been in for an extensive amount of time and starting a new career. They don't feel confident and lack credibility that then impacts on their marketing.

Our Advisory Certification program was designed from the ground up by successful advisors from across the globe. The accreditation will give anyone that is starting a new practice instant credibility and a step by step process to market your practice.

COMMUNITY & PARTNERSHIPS

Stepping into the world of advisory can be lonely. Our community of advisors allow you to mix with other advisors, network with them, receive and give referral work and continuously self develop.

The Institute of Advisors has certified advisors across the globe with online and face-to-face events running frequently to further expand your knowledge and network.

DON'T WANT TO RE-INVENT THE WHEEL

Independents often lack a detailed plan when they step into the advisory space, they want to implement a system but don't want to re-invent the wheel.

Our Advisory certification program gives you a step-by-step guide to establishing and implementing your advisory services and developing a business model that you can scale, leverage and grow.

I knew I wanted to start an **advisory practice** but didn't know where to **start** and thought I lacked the **credibility**.

The **Certified logo** gives me **credibility** & joining the **local chapters** makes me feel like I am not alone anymore.

NOT CERTIFIED & OFFERING ADVICE TO CLIENTS?

We believe that if you are a professional advisor then you need to adopt a strategic framework that governs your approach. We know that many advisors are offering poor advice to clients and this is because there are currently no mandated Business Advisory standards.

We believe that all advisors, consultants and accountancy practices should become certified in order to maintain a reputable set of standards.

The Institute of Advisors is lobbying governments around the world to adopt a set of professional standards and practices and a baseline set of skills for the business advisory industry.

The Institute course is now running in over 9 countries around the world.
